Many years ago, the earth was clean, beautiful
and wonderful. There were many clear rivers,
lakes, green forests and mountains. People
worldwide enjoyed the living at that time.

But nowadays, the high developments of industry
and technology destroyed the ecological
environment, caused many natural disasters.

We could improve the ecological environment
through China's Tai Chi thought.
Meanwhile, the masculine, feminine elements,
and compounds cause the circle of life
transmigration.

In product management, MORN SUN wishes to
devote to the earth by Tai Chi thought. And we
will develop ECO products progressively in
recent years.
Everyone should play their part in protecting
the earth.
Because it is our common responsibility.
